SUMMARY

Software Engineer with 1+ year of experience in full-stack development, building scalable applications using Node.js, Express.js, Next.js and React. Skilled in REST APIs, database design, and delivering reliable production systems. Also experienced in AI-driven automation and RAG systems to solve real-world business problems.

EXPERIENCE

Software Engineer, [Cloudilic](#) – Remote Aug 2025 – Present

- Architected production-ready RAG systems integrating LLMs with internal PDFs, achieving a 95% accuracy rate in document querying and reducing customer response time.
- Developed AI agents capable of reading, analyzing, and responding based on structured documents.
- Integrated AI solutions with Meta platforms (WhatsApp, Messenger, Instagram) and productivity tools (Trello, Google Workspace, Microsoft) to automate operations and customer interactions.
- Designed custom AI-driven solutions for clients, including marketing automation and operational workflow.
- Built automation workflows on Dragify integrating Google Workspace, Microsoft services, and webhooks.
- Collaborated with product and engineering teams to deliver scalable AI-powered automation solutions.
- Created and maintained custom internal nodes for [Dragify](#), extending its automation capabilities for client-specific processes.
- Implemented asynchronous event-driven systems with **webhooks** and background tasks to support real-time operations.
- Ensured system reliability and performance through **unit tests, stress tests, and optimizations**.

Software Engineer, [Ajwad Developments For Real Estate](#) – OnSite Aug 2024 – Aug 2025

- Engineered and optimized custom Odoo ERP modules for real estate workflows, reducing manual data entry by 40% and accelerating lead management processing.
- Developed the [company website](#) using Next.js, enhancing property showcasing, UX, and performance.
- Collaborated with sales and operations teams to identify bottlenecks and translate business requirements into technical solutions, reducing errors and manual work while enhancing product-oriented development.

PROJECTS

Personal Portfolio yousef-eslam.vercel.app

- Visit my portfolio website to explore more project showcases, including AI and full-stack work.

Dragify Automation Platform dragify.ai

- Developed and maintained custom automation workflows integrating AI, Meta platforms (WhatsApp, Messenger, Instagram), Google Workspace, Microsoft services, and webhooks.
- Created custom internal nodes and extended Dragify capabilities for client-specific business processes.
- Built AI-driven solutions for marketing automation, document processing, and operational efficiency.

EDUCATION

B.Sc. in Computer Science, El Shorouk Academy – Cairo, Egypt 2022 – 2026

Software Engineer Programme, ALX Africa 2023 – 2024

- Completed a 12-month intensive full-stack program (TypeScript, SQL), applying OOP, data structures, and algorithms to real-world coding workflows.

CERTIFICATIONS

- **IBM** – Generative AI Engineering
- **IBM** – DevOps and Software Engineering
- **DevOps** – Manara
- **System Design and Architecture** – Manara
- **ALX Software Engineering** – ALX Africa

SKILLS

Programming: TypeScript, JavaScript, Python, SQL

Frontend/Backend: React, Next.js, Node.js, Express.js, Webhooks, REST APIs, MongoDB

AI/Automation: RAG (Retrieval-Augmented Generation), LangChain, AI Agents, Embeddings, Vector Databases, Workflow Automation (n8n, Dragify, Trello, Meta, WhatsApp, Telegram)

DevOps: CI/CD, Git/Github

Soft Skills: Problem Solving, Communication, Team Collaboration, Time Management, Adaptability, Product-Oriented Thinking

LANGUAGES

- **English:** Professional working proficiency
- **Arabic:** Native proficiency
